## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 6\_Q1

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Elsa subscribes to a premium service with a base monthly cost, a service tax and an extra feature cost. Assist her in writing an inheritance program that takes input for these values and calculates the total monthly cost.

Refer to the below class diagram:

##### ***Input Format***

The first line of input consists of a double value, representing the base monthly cost.

The second line consists of a double value, representing the service tax.

The third line consists of a double value, representing the extra feature cost.

### **Output Format**

The output prints "Rs. X" where X is a double value, rounded off to two decimal places.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 10.0

2.5

5.0

Output: Rs. 17.50

### **Answer**

```
import java.util.Scanner;

class PremiumSubscription{
    private double cost;
    private double tax;
    private double extra;
    public PremiumSubscription(double cost,double tax,double extra){
        this.cost = cost;
        this.tax = tax;
        this.extra = extra;
    }
    public double calculateMonthlyCost(){
        return cost+tax+extra;
    }
}

public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        double baseMonthlyCost = scanner.nextDouble();
        double serviceTax = scanner.nextDouble();
        double extraFeatureCost = scanner.nextDouble();

        PremiumSubscription premiumSubscription = new
        PremiumSubscription(baseMonthlyCost, serviceTax, extraFeatureCost);
```

```
double totalMonthlyCost = premiumSubscription.calculateMonthlyCost();  
System.out.printf("Rs. %.2f%n", totalMonthlyCost);  
  
scanner.close();  
}  
}
```

**Status :** Correct

**Marks :** 10/10
